96/A, Galle Road, Pohaddaramulla, Wadduwa District - Kalutara

Education

University of Peradeniya – BSc in Mechanical Engineering Specialized in Mechatronics 2022-2026
GPA – 3.52/4.0

Experience

Vega Innovations – Battery System Engineering Intern July 2024 – October 2024

- Gained hands-on experience in electric vehicle (EV) technology and mechanical systems, enhancing understanding of how EVs and industrial machines function. Contributed to various stages of design and development, supported technical operations, and deepened knowledge through both engineering and project management skills.

KSPA Panadura – Mechanical Engineering Intern September 2024 – November 2024

- Gained hands-on experience in corrugated manufacturing processes and industrial machinery, developing understanding of machine mechanisms, production workflows, and system operations. Observed machine maintenance and troubleshooting processes, and supported technical analysis of cutting tools and automation components used in manufacturing, strengthening knowledge of mechanical systems and industrial operations.

Projects

Hybrid Electric Vehicle (HEV) Controller Design - Ongoing Group Project

- Designed and implemented a microcontroller-based control system for a series hybrid electric vehicle prototype.
- Simulated power flow and control logic using MATLAB/Simulink; validated battery and motor interaction.
- Developed a scaled-down working model demonstrating real-time power source switching and speed control

Cell Compression Machine Design Intern

- Designed a machine to compress LiFePO₄ battery cells to increase their cycle life.
- Used a pneumatic system to apply constant and adjustable compression force.

V6 Engine Modeling and Assembly using SolidWorks Individual

- Modeled and assembled a working 3D model of a V6 engine using SolidWorks.
- Learned the function of each engine component.

Awards

-
- First place at the Skyward Challenge organized by KDU IESL at the Techno 2024 exhibition
 - First place at Gravity Games 2024 competitions organized by SEDS Earth in collaboration with SEDS SL
 - First runners-up at Aero Day Quiz Competition, organized by Hybrid Education in collaboration with RC Falcons

Training & Certifications

Industrial Automation Workshop (PLC and SCADA)

JUL 2024

- conducted by Eng. Sugath Pradeep, Head of the Technical Industry Business – IET UoP
- The workshop provided in-depth knowledge and practical experience in PLC and SCADA technology, featuring interactive demonstrations and real-world applications.

Supervised Machine Learning :

Regression and classification - DeepLearning.AI & Stanford University by Coursera

JUN 2024

- Built machine learning models in Python using popular machine learning libraries NumPy and scikit-learn, Built and trained supervised machine learning models for prediction and binary classification tasks, including linear regression and logistic

Advanced Learning Algorithms - DeepLearning.AI & Stanford University by Coursera

JUN 2024

- Built and trained a neural network with TensorFlow to perform multi-class classification, Applied best practices for machine learning development so that the models generalize to data and tasks in the real world

Volunteering

-
- Committee Member of Automotive Society University of Peradeniya (Present)
 - Member of Students for the Exploration and Development of Space (SEDS) - chapter in University of Peradeniya (Present)
 - Member of AeroGenZ Society University of Peradeniya (Present)

Extracurricular activities

Sports

Weightlifting

- 2nd place at Inter Faculty Freshers's Weightlifting championship 2023

Volleyball

- under 15 first place, Inter House Sportmeet 2014, Sri Sumangala College, Panadura
